

## AUDIO EXTENSION CABLE

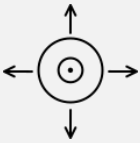

The PRO 461 extender connects audio between two GUARDIAN radio terminals.

It is used to extend communication and bypass a physical obstacle preventing radio communication (concrete wall, underground work, etc.).

Suitable for mobile operations as it does not need to be connected to a power supply.

*Reference: PRO 461*

### FEATURES:

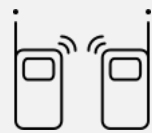

#### **BYPASSES OBSTACLES**

Extends range by bypassing obstacles preventing the passage of radio waves

#### **QUICK SET-UP**

No power supply required for operation
